JEWELLERY DESIGNING USING CORELDRAW

This course begins from starting the CorelDraw Program and covers its powerful features used to create professional graphics. How to add basic drawing elements, and create different diamonds and precious stones, how to modify those elements and then edit and color are covered in the exercises. You are then taken through some of the special effects that can be applied to them. The creative aspect of making bangles, rings, jewellery sets and other professional artwork is also covered.
